

Where Does

It

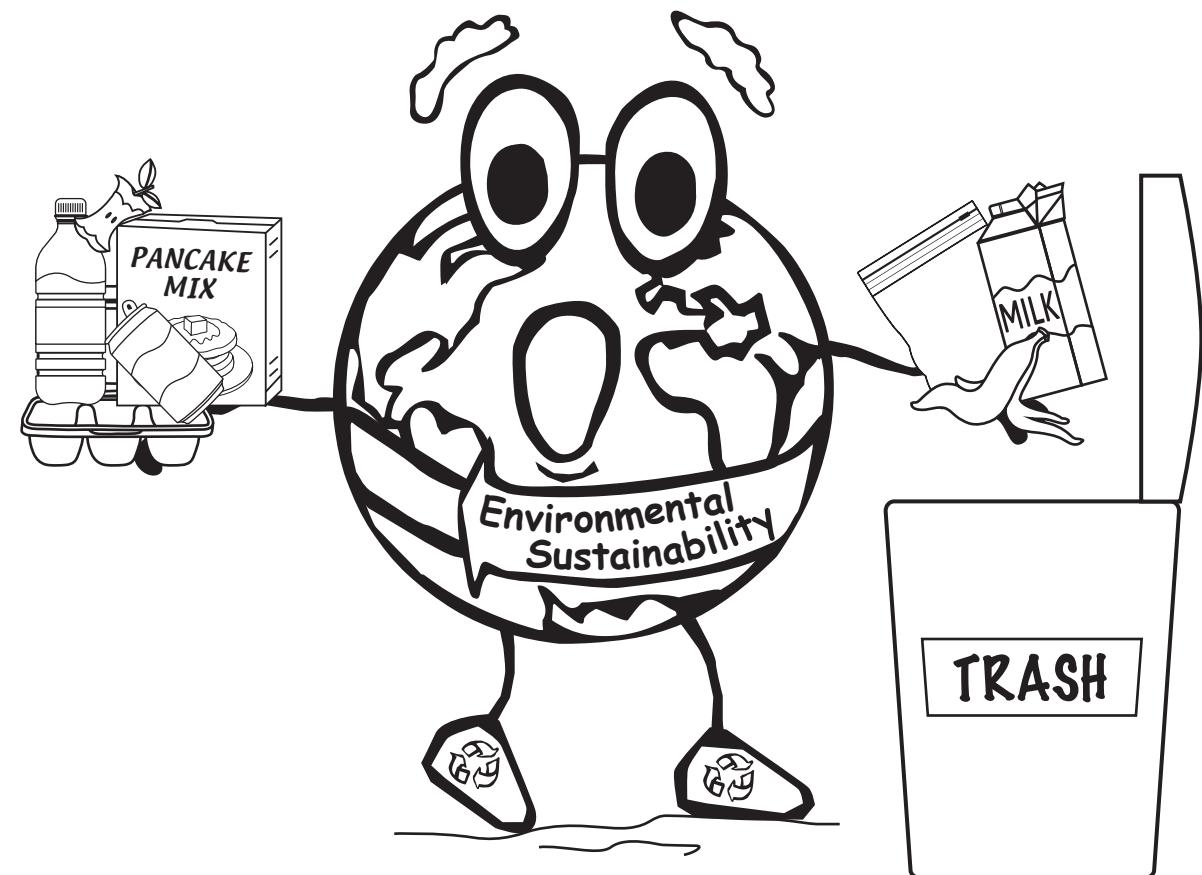

Go?

GLOBIE L[♡]VES TO COOK!

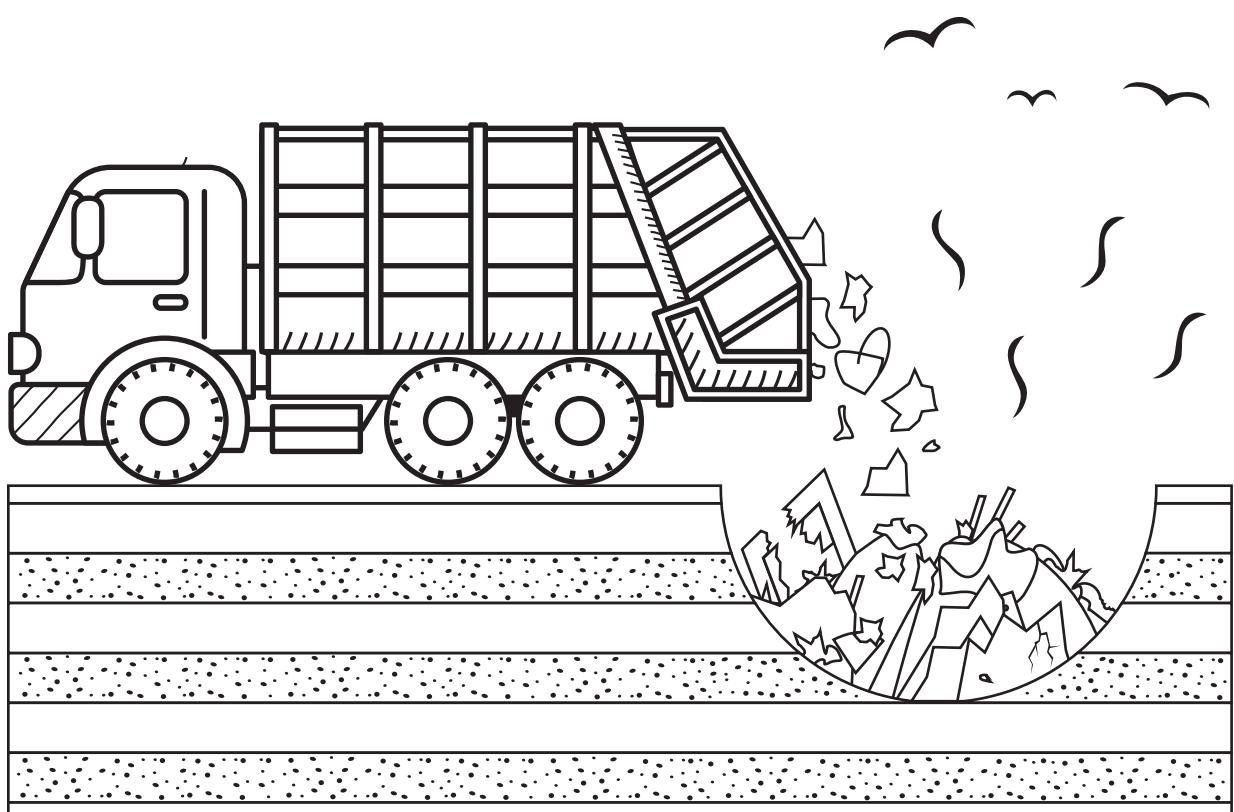

TIME TO CLEAN UP.

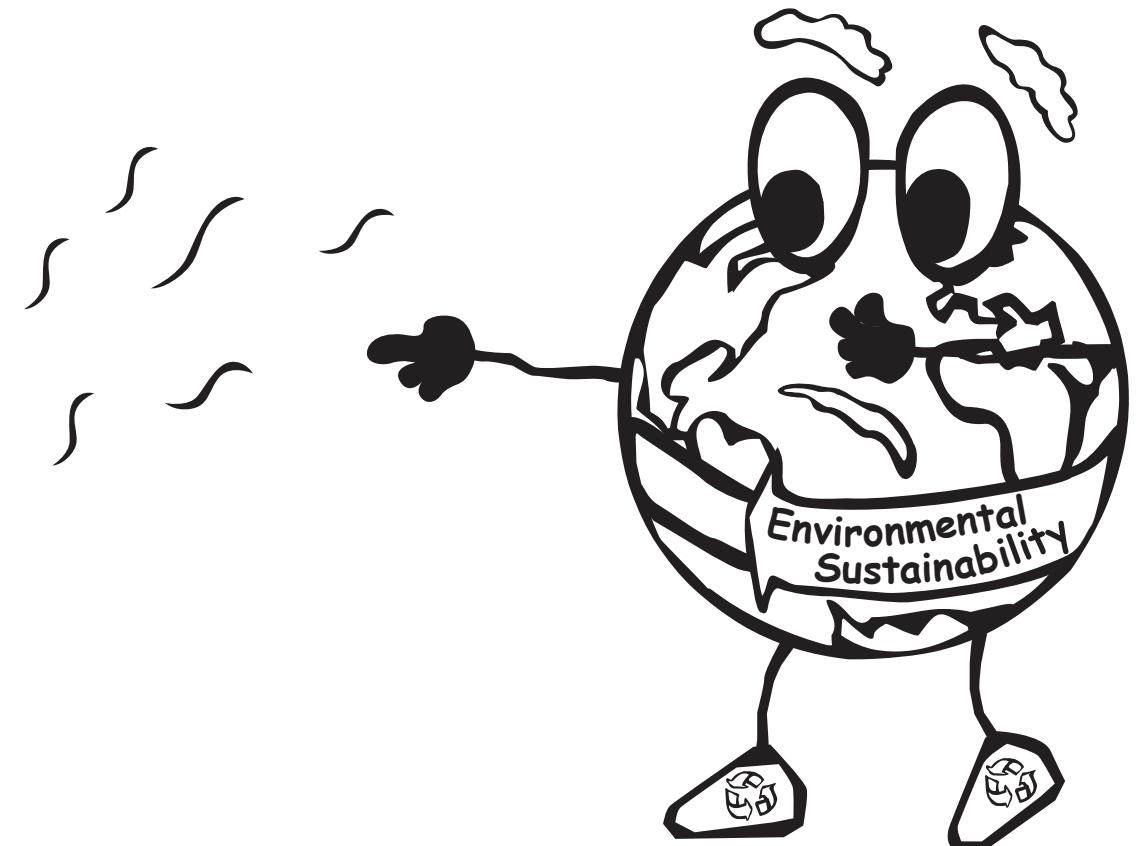

**Oh no Globie, don't throw
all of that in the trash!**

**Our trash is sent
to the LANDFILL.**

**The landfill is a
big hole in the ground
where we bury trash.**

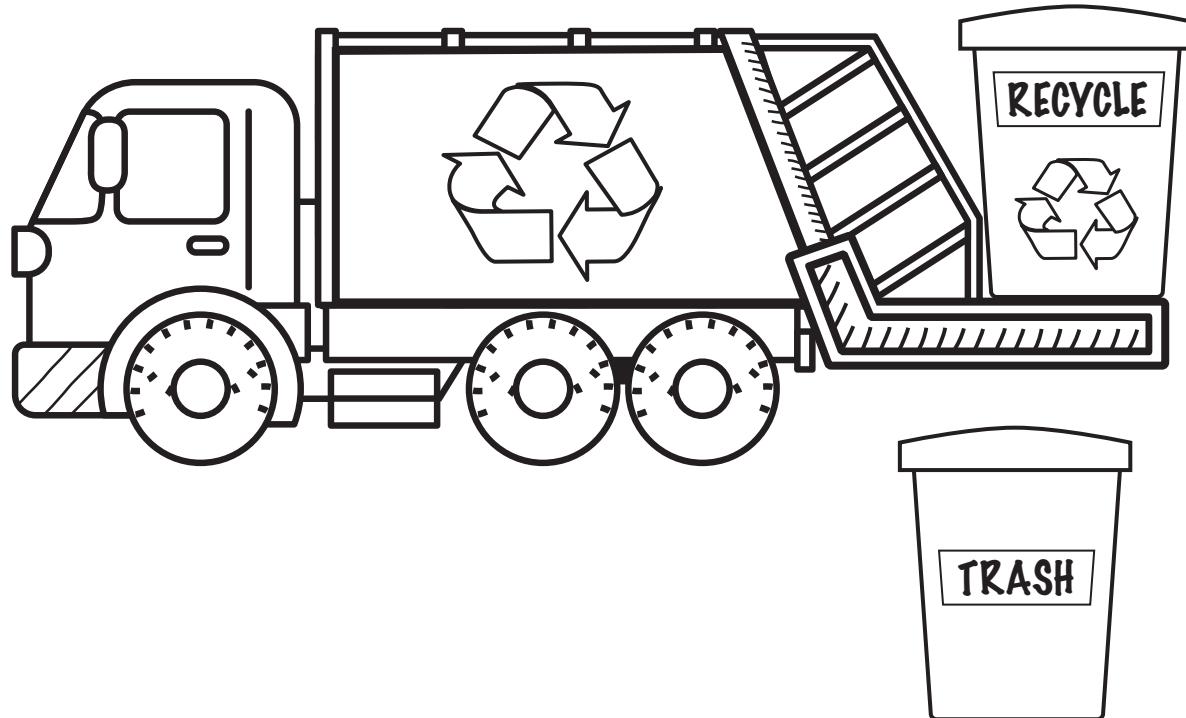

**All that trash
stinks and it's
not great for
our planet.**

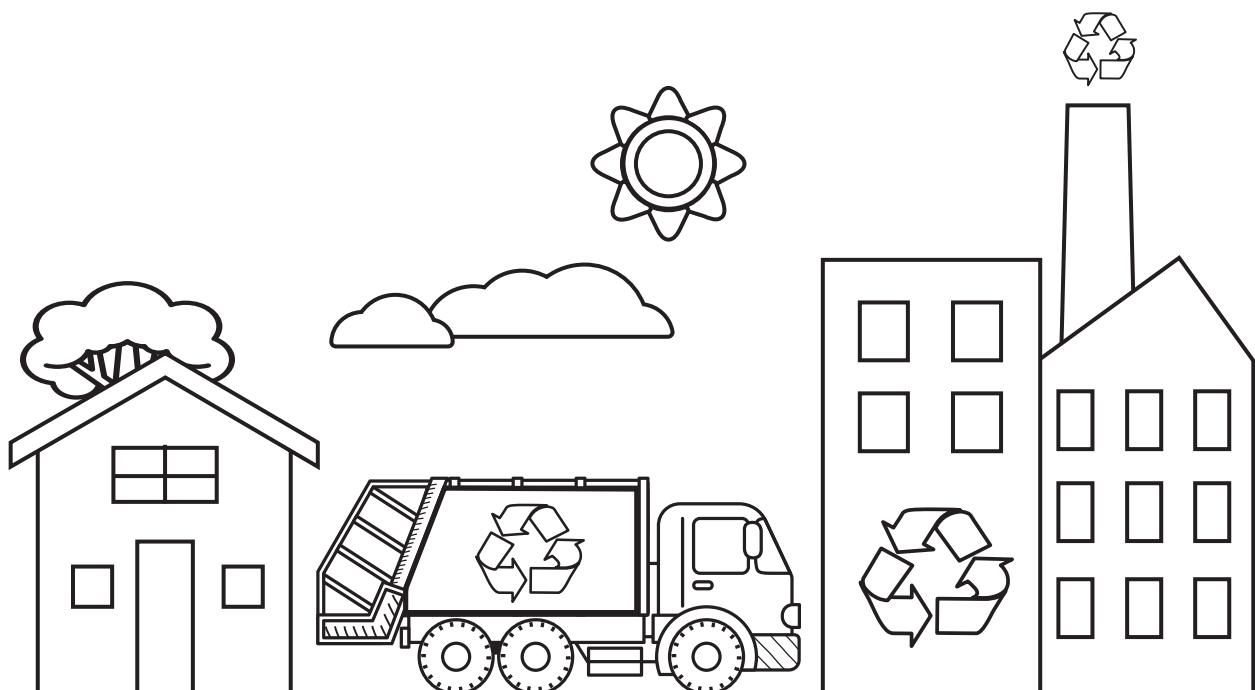

**ALL
THESE
THINGS
CAN BE
RECYCLED.**

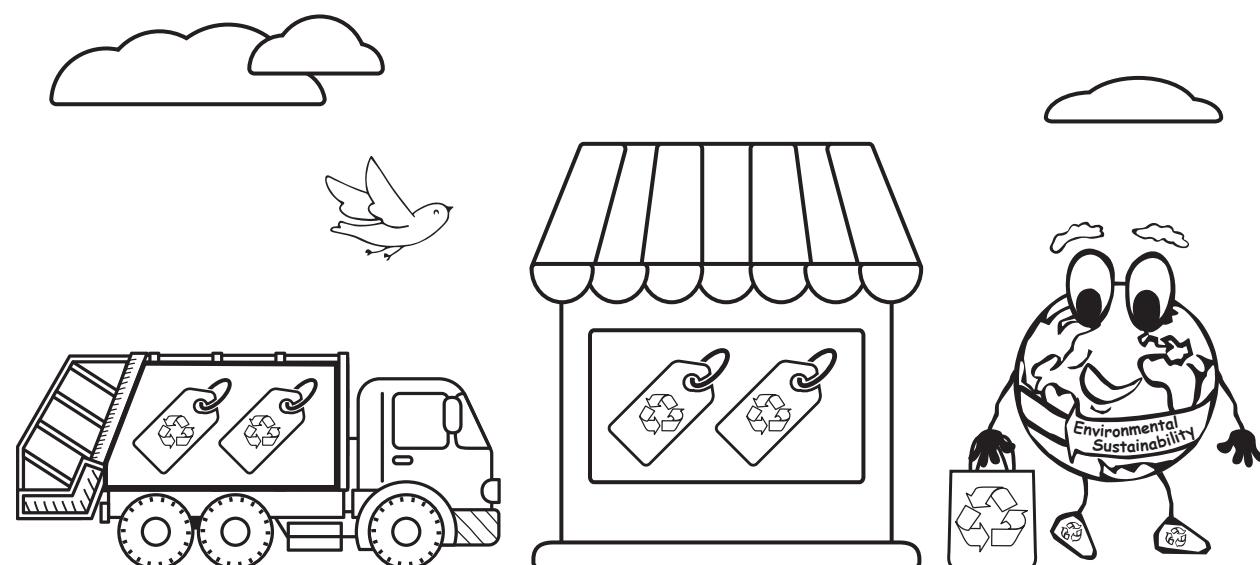

**Recycling is
picked up and
taken to the
recycling center.**

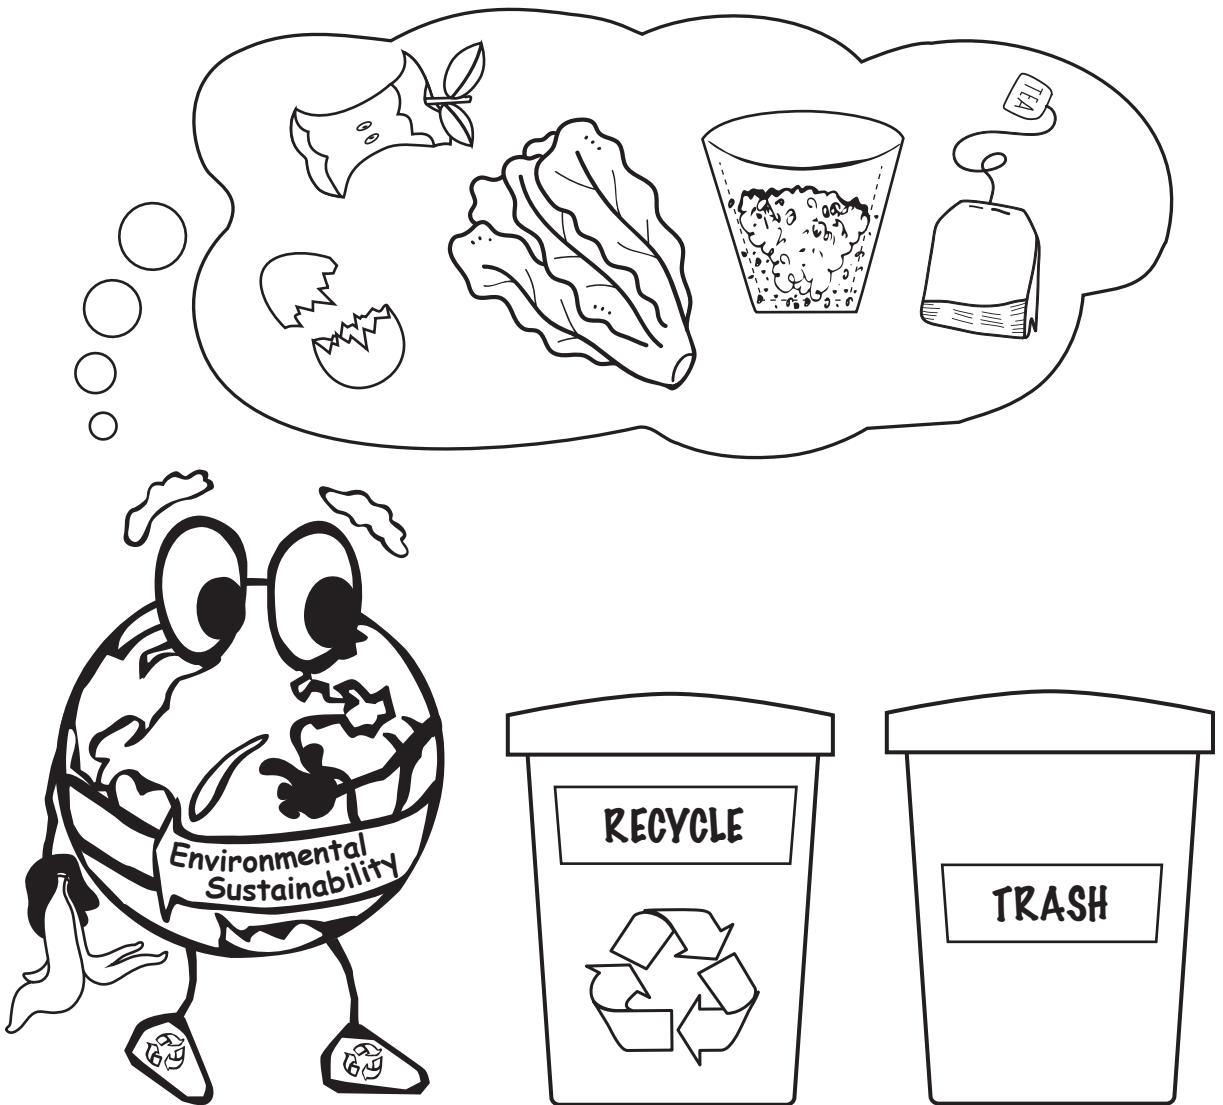

At the RECYCLING CENTER, people and machines sort through all the recycled items.

Then, it is sent away to make new things.
Most anything can be made from recycled material

Can you recycle food scraps?

No, but you can compost them.

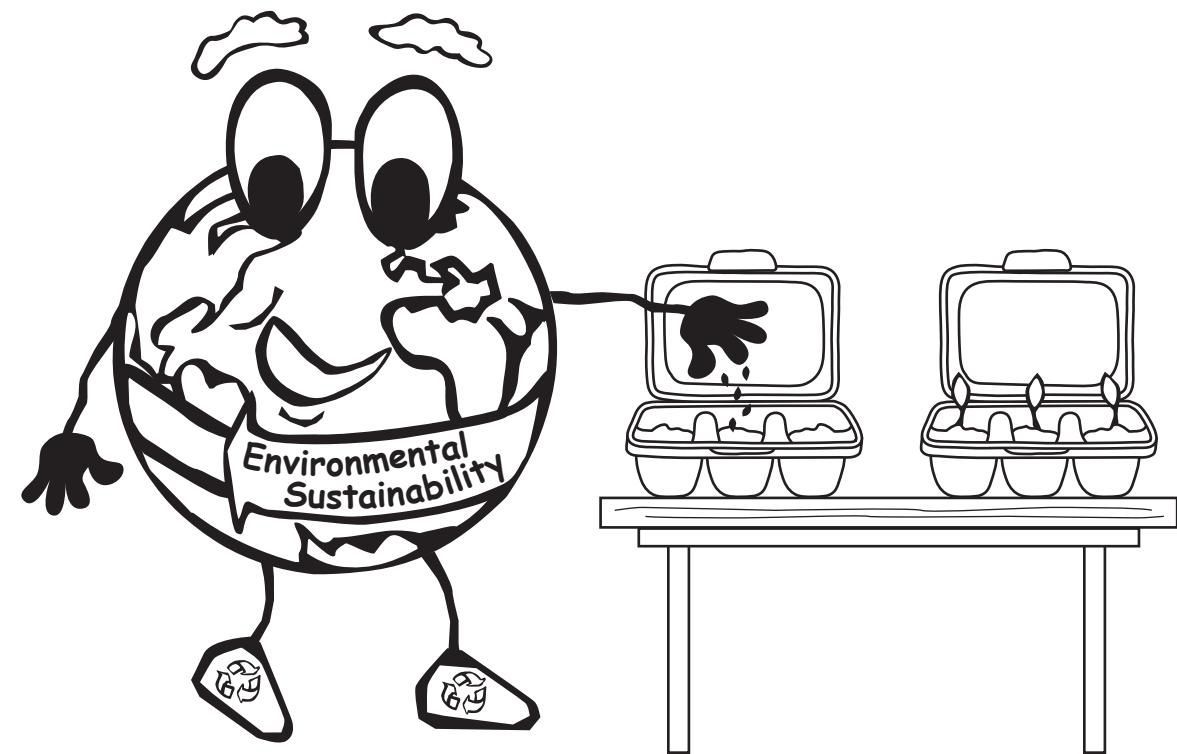

COMPOSTING turns food scraps into soil and helps us grow more food.

**Before we recycle
and compost...**

**Let's REDUCE
our Waste.**

**And choose
to REUSE.**

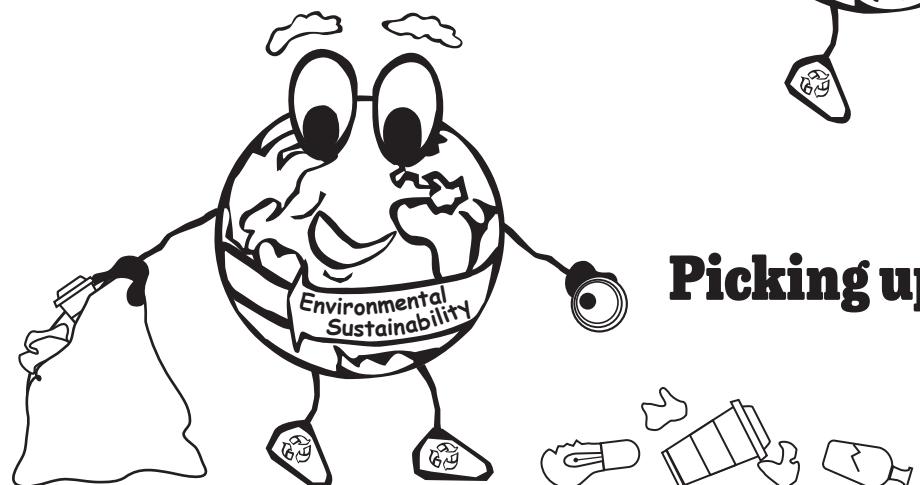

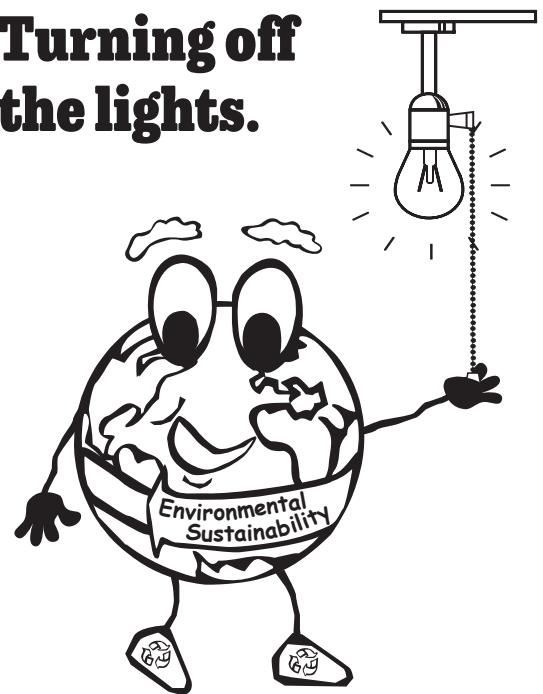

**Plant seeds in an
old egg carton.**

Globie also likes to help our planet by:

Riding a bike.

Turning off the lights.

Picking up litter.

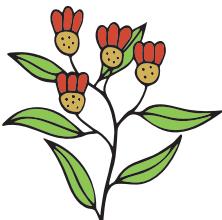

Draw a picture of you and your family helping keep our planet healthy and clean!

Always **REDUCE**

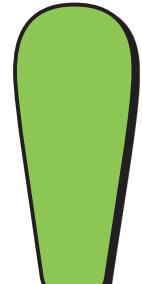

and

REUSE

**before
you**

RECYCLE!
